

The Brisbane Golf Club Men's Hole Stroke Index

It has been some time since an analysis has been undertaken to determine if the current Hole Stroke Index reflects the current scoring of the members.

The Match Sub Committee have decided to re-index the holes at The Brisbane Golf Club (BGC) to suit current scoring trends from BGC members over the 2019 season.

As of October 2019, the new Mens Stroke Index for the listed courses below will be:

Men's Stroke Index – Yeerongpilly Course																		
Hole	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Stroke Index	18	4	3	14	1	12	17	8	16	6	5	7	2	10	15	9	11	13
	33	27	28	34	19	26	35	24	31	23	36	20	32	25	30	21	22	29

Men's Stroke Index – Chelmer Course

The steps undertaken to ascertain the Stroke Indexes on the various layouts are included in this document. The Yeerongpilly Layout was used to show step by step the process in this document.

Background and Data Capture

Using as a reference Golf Australia's guideline "COURSE MANAGEMENT, MARKING THE COURSE, & COURSE SET-UP PROCEDURES – Golf Australia Recommendations (version 1 June 2014)", an analysis was undertaken on various member events held at BGC.

Over the 2019 season, gross scores from every player who returned a scorecard from various single stroke events were captured and analysed. These events were as follows:

Summer Cup: 5 January, 12 January, 19 January, 20 January

Sir Leslie Wilson Cup - 16 February, 23 February

Club Championships - 11 May, 12 May, 18 May, 19 May

Monthly Medals (not listed above) - 9 March, 27 April, 4 May, 25 May, 15 June, 20 July, 24 August

By using 17 rounds spread over 8 months, it was hoped that the data covered various playing conditions e.g. wind, temperature, rain, course conditions.

Here at BGC, there are 21 holes available to use for any 18 hole competition. All 21 holes were evaluated if they were in use for competition on the dates above.

A total of 2474 rounds were used in this analysis.

Determining Where Stroke Indexes Are Given

A comprehensive statistical method for determining the Stroke Index for each hole was undertaken. Players were split into handicap groups, and the 'average over par' score calculated for each hole within each group.

Examples of considerations that support the pursuit of such an approach are as follows:

Will a 15-marker and a 1-marker both agree on what is the hardest hole on a course? Not necessarily as they have quite different skill levels and will play the game in different ways. But does it matter what hole the 15-marker will find the most difficult? Not at all because whether a given hole is the hardest on the course or the sixth hardest, the 15-marker will still receive a handicap stroke – for them it is simply an interesting point of discussion. But it is critical for the 1-marker because for them it is the difference between receiving a handicap stroke on a hole and not.

Is there likely to be a notable difference from low to high markers as to the degree of difficulty that will be ascribed to a hole? There certainly can be, and it is a particularly common occurrence with par 5s. Par-5 holes are relatively easy for low markers, but can become harder the higher the handicap of the player. This is because a longer marker must hit three relatively good shots on a par-5 hole to be near the green. Given longer markers' inconsistencies, this can be a challenging proposition. On the other hand, when a low marker stands on the tee of a par 5, their standard thought is "good birdie chance".

These handicap groups used for this analysis were as follows:

Scratch and better to 6, 7-12, 13-18, 19-24, 25-36.

These groups roughly follow the gradings currently at BGC with A grade and C grade broken into 2 sub groups as the handicap variances are larger in these grades.

The results for the dates listed earlier used for this analysis for each handicap group is included in Appendix 1.

A season summary for each handicap group is included in Appendix 2.

Each of the handicap groups had slight variances on the difficulty ratings for each hole as Table 1 shows.

Table 1 – Difficulty Rating For All Handicap Groups For All 21 Holes

For BGC, the majority of rounds when all 21 holes are available to play are either on the Yeerongpilly, Chelmer, or Championship layouts. Any other temporary layouts when works on portions of the course dictate certain holes are out of play, the same steps can be undertaken to determine the Stroke Indexes for that temporary layout. For the relative brevity of this report, the Yeerongpilly Layout will be detailed in the steps below to show how the stroke indexes were derived, with the Chelmer and Championship layouts also calculated with the same steps, and these stroke indexes shown in summary only.

Step 1

Compile a table based on Table 1 for the 18 holes to be used in any particular layout.

Table 2 shows the holes used in the Yeerongpilly layout and their difficulty rating relative to the other holes on this layout. Holes 19, 20 and 21 are not part of the Yeerongpilly layout, and therefore they have been removed and the ratings have been adjusted to accommodate the 18 holes in the Yeerongpilly Layout.

Step 2

Highlight the SIX holes with the highest difficulty for the handicap group + to 6. (i.e. the six hardest holes for this handicap group). These holes then become ranked 1 to 6 on the Stroke Index.

Step 3

Using the handicap group 7 - 12, identify the SIX hardest holes for this group in difficulty order. These six holes then become ranked 7 to 12 on the Stroke Index. The holes listed as 1 to 6 in the previous step have already been taken into account and are not used for this step.

Step 4

Using the handicap group 13 - 18, identify the SIX hardest holes for this group in difficulty order. These six holes then become ranked 13 to 18 on the Stroke Index. The holes listed as 1 to 12 in the previous steps have already been taken into account and are not used for this step.

2nd Handicap Shot Holes

Now that the players that receive a maximum of 1 shot a hole have been covered, for the allocation of Stroke Indexes for players on handicaps above 18, there are 2 options to consider.

One common practice for allocating handicap strokes to players on handicaps of 19 - 36 is for the distribution to replicate the order used for players on handicaps of 1 - 18. For example, the Index in such cases would read 1/19, 2/20, 3/21, 4/22, 5/23, etc.

However, whilst holes with Index 1 and Index 2 may be the most difficult holes for 1 and 2-markers, they may not be the most difficult holes for a 20-marker. Therefore, a split index may be more appropriate. For example, a Committee may consider a given hole to be the most difficult hole on the course for a low marker and yet the seventh hardest hole for a higher marker. This hole would be recorded on the Index table as 1/25.

Consideration of par 3s is the typical reason to use a split Index. Many officials will consider that a difficult par 3 will be worthy of a low marker receiving a handicap stroke. However, they will also consider that the hole will be relatively easy for a higher marker to make a bogey on. As a result, they will take the view that allocation of two handicap strokes to a 20-something marker on a par 3 will be too generous (consequently, and where a course has four par 3s, some officials will allocate numbers 33-36 in the Index to these holes).

Table 4 – Comparison of Difficulty Rating For 2nd Handicap Shots For Yeerongpilly Layout

Hole	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Hcp + - 6	18	4	3	12	1	13	16	7	17	6	5	10	2	11	14	9	8	15
7 - 12	18	5	7	13	1	12	16	6	17	4	11	3	2	9	15	8	10	14
13 - 18	18	7	10	13	1	11	17	5	16	6	14	2	4	8	15	3	9	12
19 - 24	18	7	10	15	1	11	17	6	14	5	16	2	9	8	12	3	4	13
25 - 36	15	9	10	16	1	7	17	4	13	8	18	2	14	5	12	3	6	11

From Table 4, whilst there are a few holes that the higher markers difficulty rating aligns with the lower markers, it is clear that the par 3's at BGC play easier than other holes for the higher marker with regard to receiving 2 handicap strokes. Therefore, a split index is more appropriate at BGC.

Step 5

Using the handicap group 19 - 24, identify the SIX hardest holes for this group in difficulty order. These six holes then become ranked 19 to 24 on the Stroke Index.

Step 6

Using the handicap group 25 - 36, identify the remaining holes for this group in difficulty order. These remaining holes then become ranked 25 to 36 on the Stroke Index.

	33	27	28	34	19	26	35	24	31	23	36	20	32	25	30	21	22	29

Other Factors to Consider

Even Distribution of Handicap Strokes

Ideally, the Indexes should be spread relatively evenly between the front and the back nine. This works well on courses where there is only 18 holes and/or generally a lot of 9 hole competitions.

Looking at the final Stroke Index upon completion of Step 6, below is the order from hardest to easiest:

5 (front), 13 (back), 3 (front), 2 (front), 11 (back), 10 (back), 12 (back), 8 (front), 16 (back), 14 (back), 17 (back), 6 (front), 18 (back), 4 (front), 15 (back), 9 (front), 7 (front), 1 (front).

The hardest 8 holes are balanced 4 on the front and 4 on the back. The above shows that the back 9 plays slightly harder as the 3 easiest holes in this configuration are on the front 9.

Most male members who play in a competition at BGC play an 18 hole competition, so balancing the front and back nines is not really required.

Indexing Holes for Players on Plus Handicaps

Golf Australia recommends that indexes *“should also be mindful of Plus Handicap players. For clarification, many times the easiest hole on the course may be a par 3, and therefore, a Plus Marker would require a hole-in-one to have a ‘win’ on the hole in Par or to have 3 points on the hole in Stableford. It may be more appropriate for Committees to consider par 5 holes for these players. In Plus Handicap situations, Committees may have a note somewhere on the card in a prominent position saying: “Plus markers will give strokes in the following order – e.g. 6th, 13th, 2nd, 17th, etc.”*

As BGC does not have too many golfers below +3, a quick look at the data for the handicap group + to 6 shows that the 1st is the easiest hole (index 18), then the 7th (index 17) and then the 9th (index 16). These are the 3 holes where +3 markers have to give up a shot, and the proposed indexes reflect this case.
